

A SAMPLE L^AT_EX ABSTRACT FOR A TALK AT ILAS 2020

NIALL MADDEN

This is a sample abstract for talks presented at ILAS 2020, to be held in Galway (Ireland) in June 2020.

Please, follow the instructions at <http://ilas2020.ie/abstracts/> for submitting your abstract. Make sure you upload the `.tex` file, and not any others.

Try to keep your file as simple as possible, so that it is easily rendered in various formats. Give the file a name that readily identifies it with you, for example `OlgaTaussky.tex`.

If you wish to include citations, you can do so like this: [1]. Use a bibitem key that is likely be be unique to you (e.g., don't use the default Math Reviews key). Any uncited bibliography entries will also appear. If you have none, then delete that section.

This is joint work with John Todd (Caltech) and Alexander Ostrowski (Basel). Supported by the National Mathematics Foundation, Grant XYZ-123.
